REPORT No. 595339/19/CGDA**1. THE BASIS TO CONDUCT THE STUDY**

- Samples delivered by the Client.
- The qualitative composition of the products delivered by the Client
- The results of microbiological purity of the products provided by the Client.
- Negative results of semi-occlusive patch tests provided by the Client.

The Client is responsible for conformity with the declared quality composition of the products, negative result of dermatological test and microbiological purity test of the delivered samples.

SCOPE OF TESTS COMPLIANT WITH:

- Regulation of the European Parliament and of the Council (EC) No. 1223/2009 of 30 November 2009 on cosmetic products.
- Cosmetics Europe – The Personal Care Association (previously COLIPA) Guidelines "Product Test Guidelines for the Assessment of Human Skin Compatibility 1997."
- Cosmetics Europe – The Personal Care Association (previously COLIPA) Guidelines for the Evaluation of the Efficacy of Cosmetic Products 2008.
- Technical Instruction exercised at the J.S. Hamilton Poland IT-01/PK.
- Technical Instruction exercised at the J.S. Hamilton Poland IT-03/PK.
- Technical Instruction exercised at the J.S. Hamilton Poland IT-14/PK.
- Technical Instruction exercised at the J.S. Hamilton Poland IT-16/PK.
- Technical Instruction exercised at the J.S. Hamilton Poland IT-45/PK.

3. AIM OF THE STUDY

Confirmation/exclusion of the declared properties and efficiency of the product.

3.1 Products claims/properties declared by the Client**❖ SHAMPOO**

- The product gently cleanses hair and scalp.
- The product left hair easy to comb wet hair.
- The product left hair easy to comb dry hair.
- The products left the hair smooth and silky.

❖ LOTION

- The product does not left the hair sticky or greasy.
- The product is easy to apply.
- The product is respectful to scalp.

❖ CAPSULES

- The capsule is easy to swallow.

❖ ALL PRODUCTS: SHAMPOO, LOTION AND CAPSULES

- The products reduce the number of grey hair.
- The products recovering the natural color of the existing ones.
- The products help to fights against grey hair.
- The products improve general appearance of the hair.
- The products restore original hair colour.
- The products help to visibly reduce grey hair.
- In general the 3 product routine is easy to follow.

3.2 Study duration

- ❖ 12 weeks (+/- 2 days)

Authorized by: Katarzyna Cięszczyk, Project Manager Senior Assistant (qualified electronic signature)
Karolina Osiecka, Dermatologist-Venereologist, 2487308

Laboratory: ul. Bajana 3D, 80-463 Gdańsk, Poland

The results relate to the analysed samples only.

This Report cannot be reproduced partially without a prior written consent of J.S. Hamilton Poland Sp. z o.o. Responsibility of J.S. Hamilton Poland Sp. z o.o. is restricted exclusively to the results and statements presented in original copy of the Report. The service confirmed by this Report is subject to the General Terms and Conditions of Services of J.S. Hamilton Poland Sp. z o.o. published on www.hamilton.com.pl

3.3 Testing methodology**3.3.1 Use test**

Dermatologist included the subjects to the study. The use test conducted at home under dermatological control. The study concerned on:

- assess the impact of cosmetic on tolerance at the application site as a result of regular, repetitive application of the product, according to the purpose and use of the specified time (repetitive test);
- research leading to confirm or exclude the effect claimed for the cosmetic.

The Evaluation Questionnaire form, the characteristic of the panel and number of subjects were in line with Client requirements. The product was applied by subjects accordance with the declared method of use.

Declarations will be confirmed only if the ratio of the received positive responses to the total number of subjects participating in the study will be above 50%.

3.3.2 Instrumental test**3.3.2.1 Photographic documentation**

The photos are documenting the effect of the tested set of products at the site of application. The photos have been taken before products application (D0), after 4 weeks days (D28) and after 12 weeks days (D84) of regular use. The study has been carried out on 29 subjects.

Authorized by: Katarzyna Ciężczyk, Project Manager Senior Assistant (qualified electronic signature)

4. DESCRIPTION OF SUBJECTSInclusion criteria:

GENERAL	Sign an informed consent to participate in the study, were informed about the purpose of the study, the manner of its conduct and the possible side effects.	
	The site of product application without irritation and changes requiring pharmacological treatment (specialist evaluation).	
SPECIFIC	Amount of subjects:	29 subjects included
	Gender:	Women
	Age:	18+
	Skin type:	All
	Other:	Subjects with grey hair

The test results may be affected by such factors as:

- type and condition at the site of product application,
- inter-individual genetic characteristics,
- individual preferences of subjects.

5.2 Assessment of the cosmetic's impact on tolerance at the site of application on group of subjects (repeated application)

On the basis of medical examinations and interviews collected from subjects we found that the tested set of products **GREY HAIR SHAMPOO AND CAPSULES AND LOTION** was very well tolerated at the application site. In all subjects, who finished the study, during the regular application, in the interview there was no negative symptoms and feelings that might indicate an intolerance to any component of the products, such as irritation, burning sensation, redness or itching. The product did not cause dryness at the site of application in any subjects.

Contraindications for use of the product are: acute inflammation of the place of application, requiring pharmacological treatment, and allergy recognized or hypersensitivity to any of its ingredients.

The results obtained in the test allow to conclude, that the set of products used as intended is very well tolerated by the people, in whom there is not a contraindication to its use.

5.3 Confirmation of the effect claimed for the cosmetic products

Regulation of the European Parliament and of the Council (EC) No. 1223/2009 of 30 November 2009 on cosmetic products.

Based on the results of use test – subjective feelings of subjects we concluded that properties of the set of products **GREY HAIR SHAMPOO AND CAPSULES AND LOTION** declared by the Client were assessed as follows:

❖ SHAMPOO		
• The product gently cleanses hair and scalp.	100%	positive responses
• The product left hair easy to comb wet hair.	93%	positive responses
• The product left hair easy to comb dry hair.	90%	positive responses
• The products left the hair smooth and silky.	86%	positive responses
❖ LOTION		
• The product does not left the hair sticky or greasy.	83%	positive responses
• The product is easy to apply.	93%	positive responses
• The product is respectful to scalp.	97%	positive responses
❖ CAPSULES		
• The capsule is easy to swallow.	90%	positive responses
❖ ALL PRODUCTS: SHAMPOO, LOTION AND CAPSULES		
• The products reduce the number of grey hair.	55%	positive responses
• The products recovering the natural color of the existing ones.	59%	positive responses
• The products help to fights against grey hair.	59%	positive responses
• The products improve general appearance of the hair.	93%	positive responses
• The products restore original hair colour.	59%	positive responses
• The products help to visibly reduce grey hair.	48%	positive responses
• In general the 3 product routine is easy to follow.	100%	positive responses

Moreover:

❖ SHAMPOO		
• Fragrance.	76%	positive responses
• Fragrance intensity.	97%	positive responses
• Fragrance remaining on the hair.	76%	positive responses
• Consistency.	76%	positive responses
• Spreadability.	97%	positive responses
• Rinsing.	100%	positive responses
• Product application (comfort of use).	97%	positive responses
